WEAVER DIGITAL

Giving us access to your Porkbun account

For clients whose domain name is at Porkbun. Adding us as an Authorized User lets us make deeper changes for you, without ever needing your password.

1. Verify your phone
2. Turn on two-factor
3. Add Weaver Digital

About 10 minutes
Go at your own pace

Nothing to pay
It's a free Porkbun feature

Remove us any time
From the same page

BEFORE YOU START

Have these ready

Your Porkbun login

Your username and password.

Your phone

With Google Authenticator or Microsoft Authenticator installed. Both are free.

Your email

Porkbun sends a verification code if your email isn't verified yet.

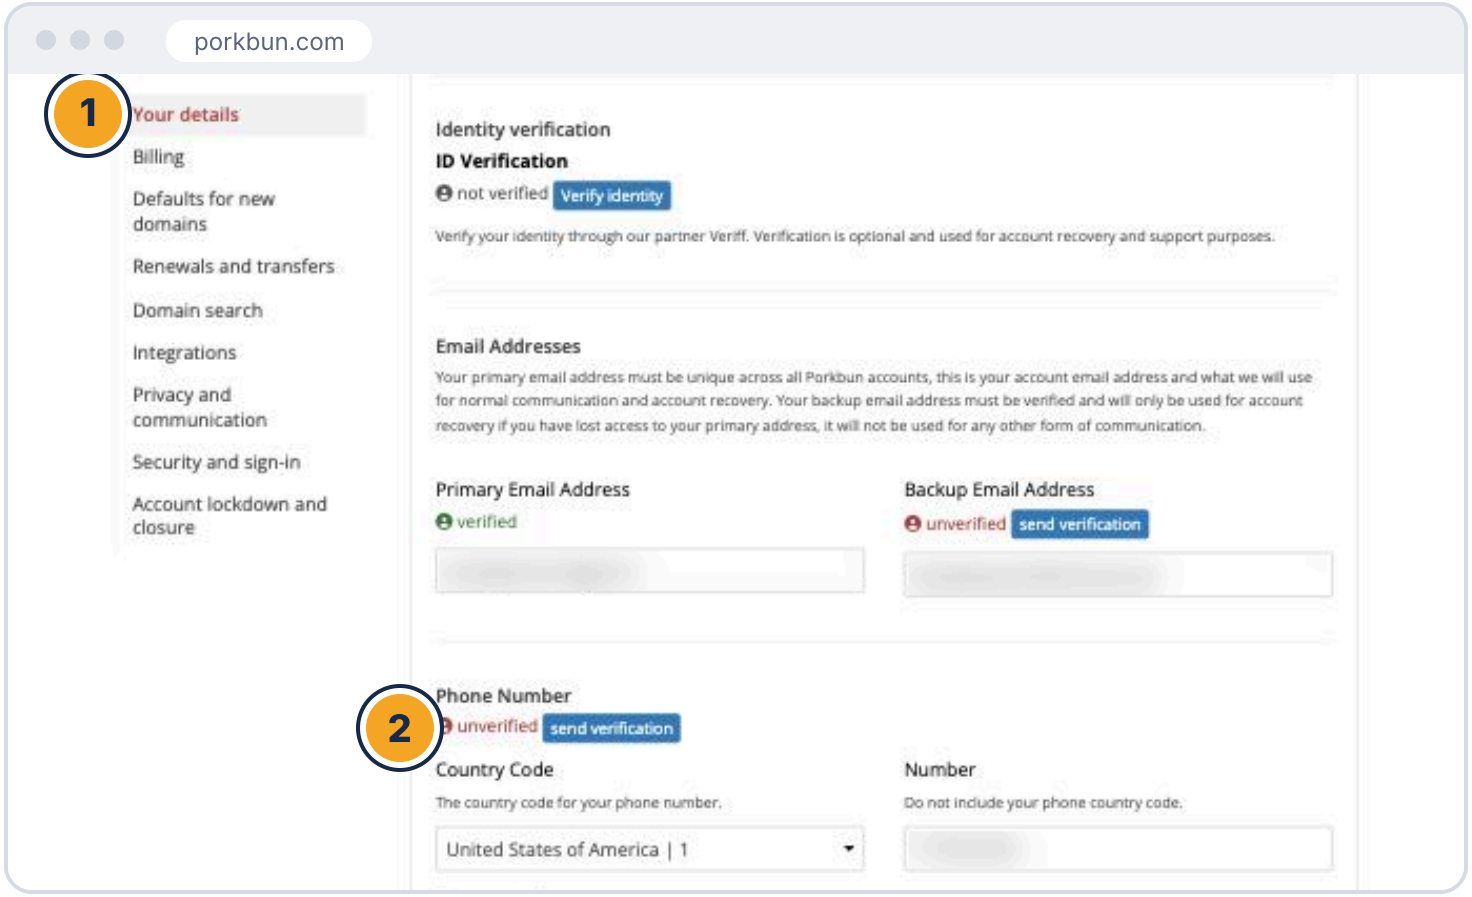

> **Why Porkbun asks for all this:** an authorized user can make changes on your account, so Porkbun makes sure both accounts are locked down first. Ours already is.

STEP 1

Verify your phone

1. Click **ACCOUNT** (top right), then **Settings / Billing**. You'll land on **Your details**.
2. Click **send verification** beside your phone number, and enter the code Porkbun texts you.
3. Check your **Primary Email Address** says **verified**. If not, verify it the same way.

> Porkbun needs both before you can give us access. **ID verification** on this page is optional.

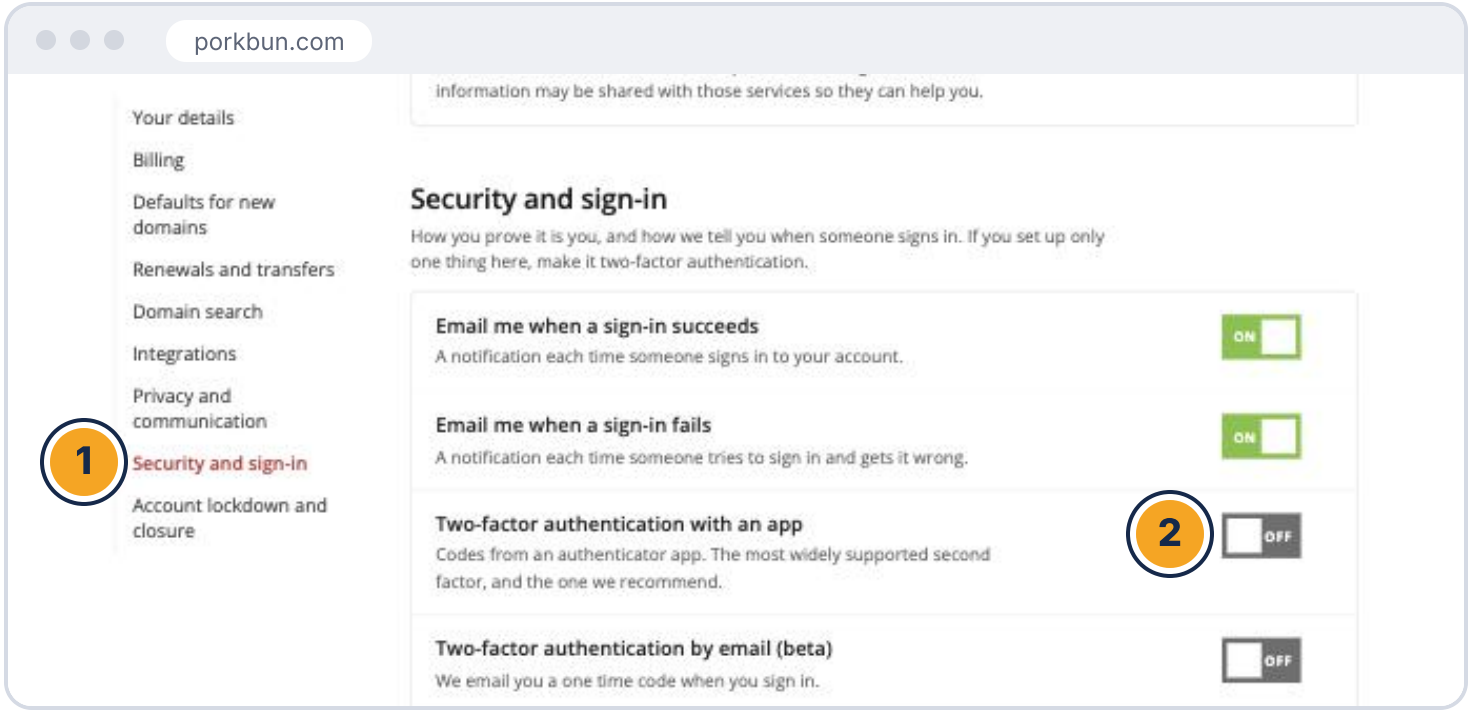

STEP 2

Turn on two-factor sign-in

First, install **Google Authenticator** or **Microsoft Authenticator** on your phone. Both are free.

1. Still in Settings / Billing, click **Security and sign-in** on the left.
2. Switch on **Two-factor authentication with an app**, and click **OK** on the pop-up.

Use the app, not the email option. Porkbun only accepts an app or a security key here.

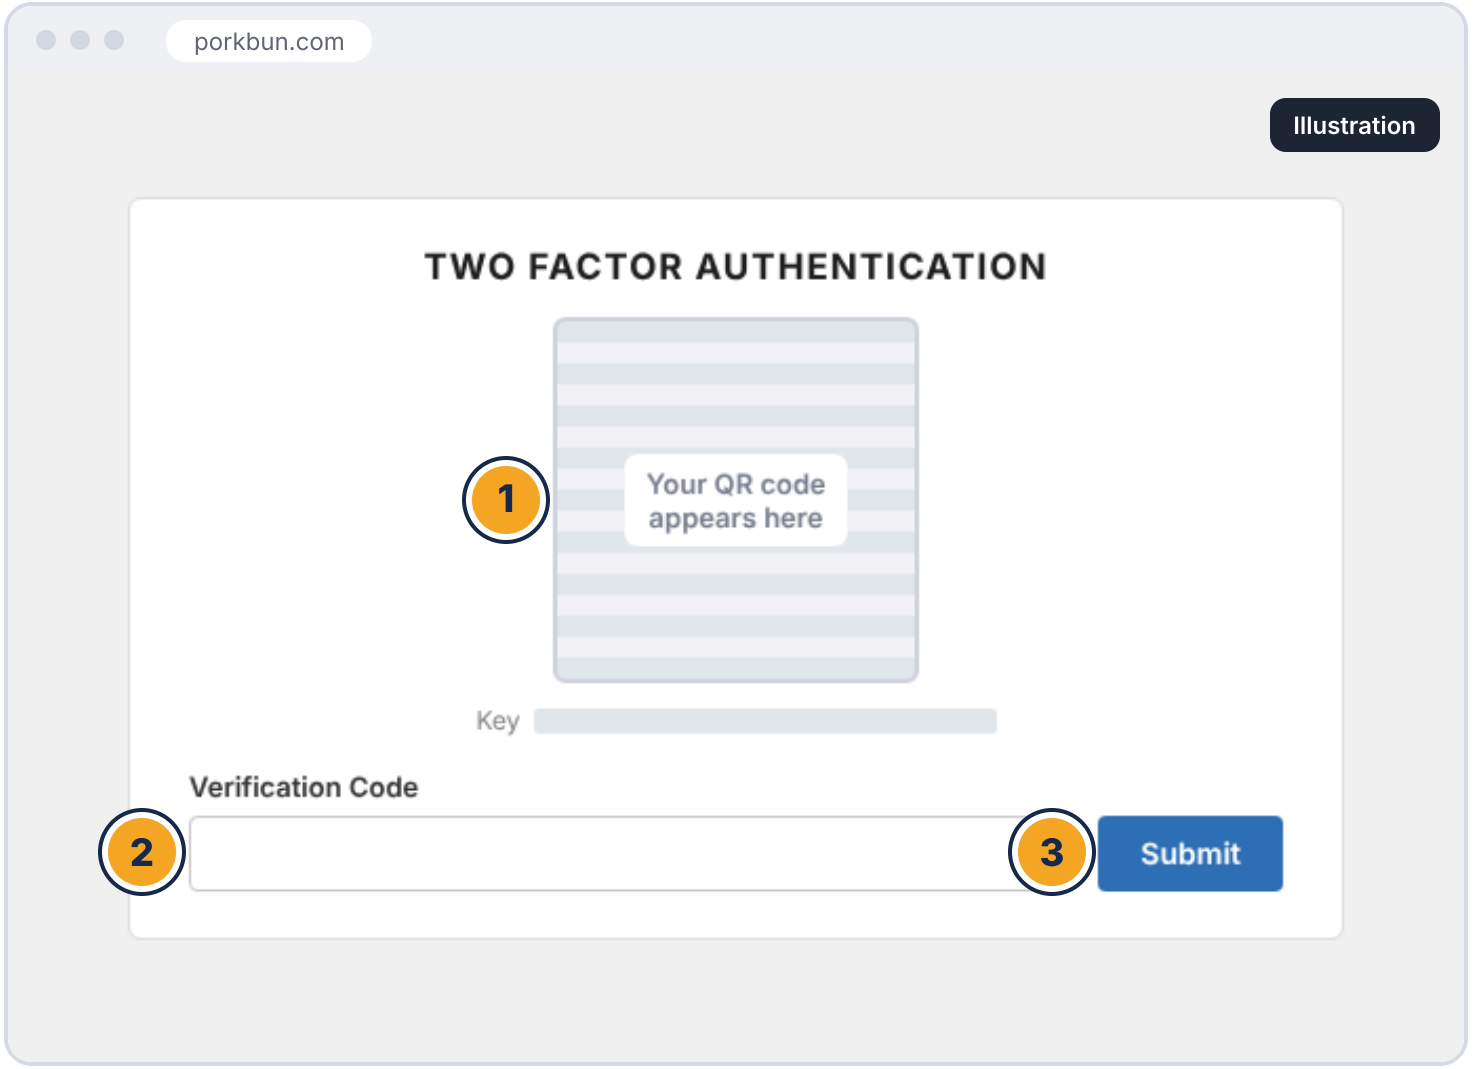

STEP 2

Scan the code with your phone

1. In your authenticator app, tap **+** and scan the QR code.
2. Type the six-digit number into **Verification Code**.
3. Click **Submit**.

> **Save the backup codes** Porkbun shows you next. They get you in if you lose your phone. Never share them, even with us.

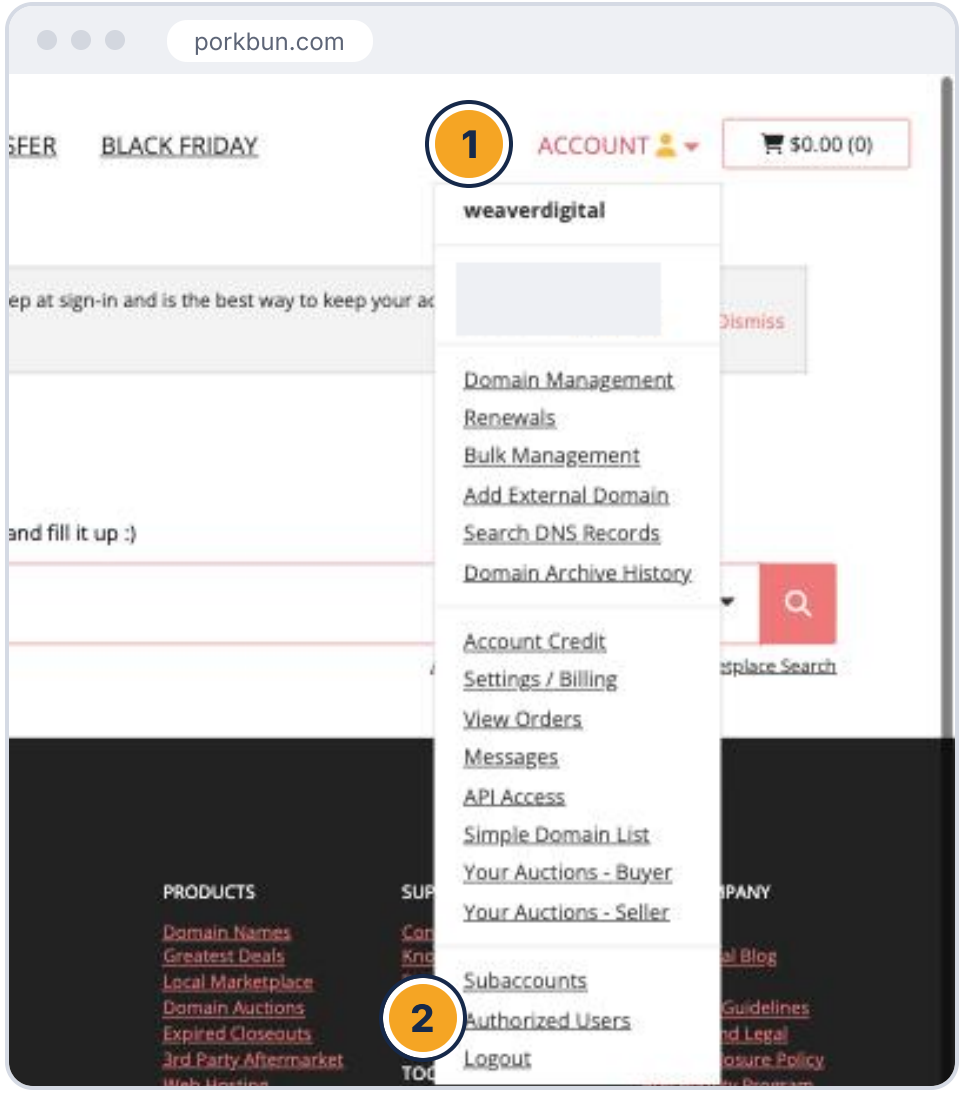

STEP 3

Open Authorized Users

1. Click **ACCOUNT** in the top right.
2. Choose **Authorized Users**, near the bottom of the menu.

> The menu is long. Authorized Users sits just below Subaccounts.

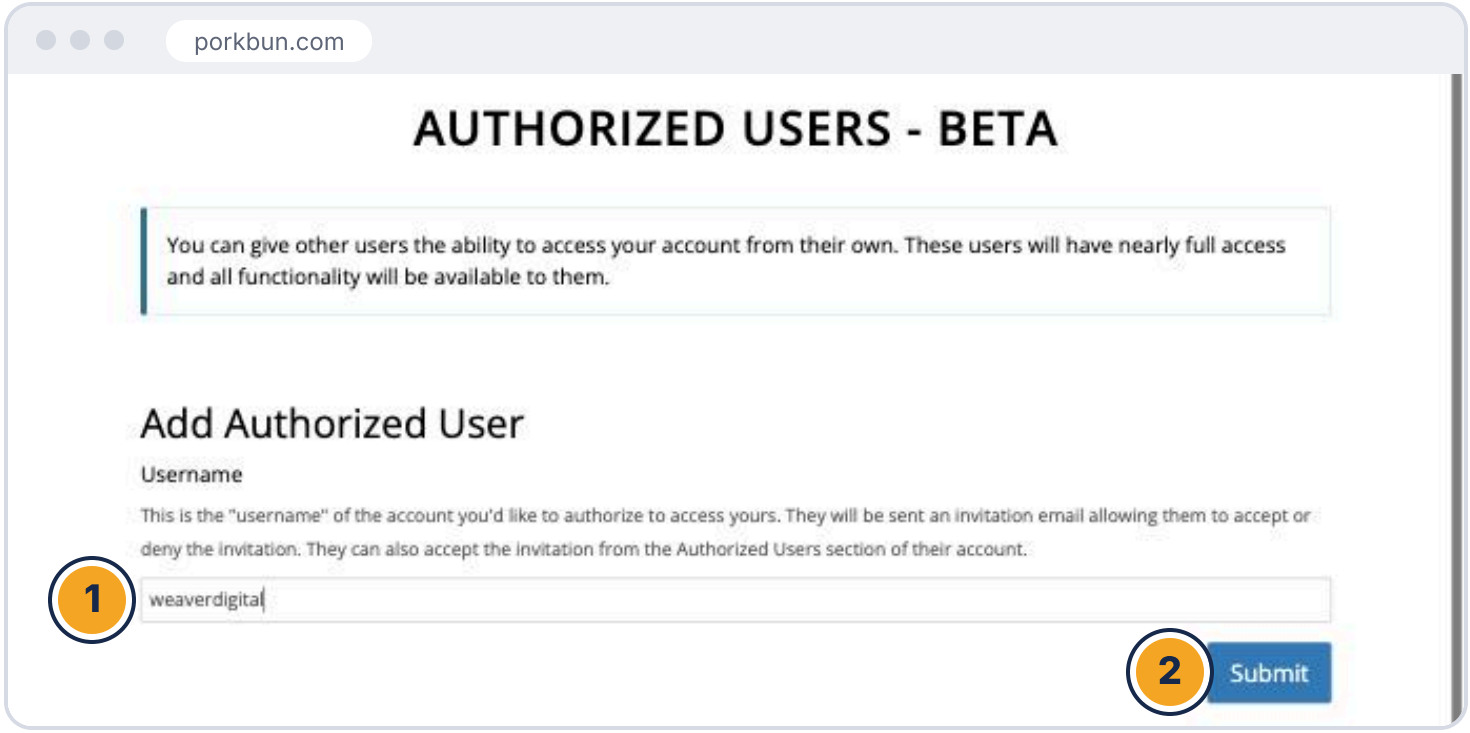

STEP 3

Add Weaver Digital

1. Under **Add Authorized User**, type **weaverdigital** as the username.
2. Click **Submit**.
3. We'll get an email and accept. You're done!

We can make changes for you, like connecting your domain name to your website or setting up email.

We can't transfer your domain or change your password. Remove us any time.

ALL DONE

Let us know you've sent it

Email us once you've clicked Submit. We'll accept the invitation, and you'll see us listed on your Authorized Users page.
